Do naszego Oddziału w Łodzi poszukujemy:

Internship / Research

Human Resources Department: Research on effectiveness of Development Program

Task:

The trainee is expected to carry out a research on effectiveness of development program for middle management. The main task would be to lead data collection and reporting process, especially reader-friendly research reports.

Work on the research requires cooperation with corporate Human Resources Department in Munich and training provider.

The trainee would have an opportunity to work in an international corporation and gain practical experience in research work and human resources management. It is possible to write a Bachelor or Master thesis based on the research. Internship will be paid.

Knowledge and experience:

Graduate or advanced college student, preferably social sciences, anthropology, cultural studies, education or similar. Experience conducting interviews and/or participating in research work and/or having written a research paper desirable. One year work (internship) experience. Computer literacy.

Skills & attitudes

Curiosity and learning, open attitude to conduct interviews and learn more about the topic of research. Effective communication skills, especially the skill to inquire and ask probing questions and handle responses when conducting interviews. Analytical skills to analyze and classify a great amount of information, and look for patterns in the data. Linguistic skills to organize information and report the data found in a compelling manner, and to write reader-friendly research reports. Team work.

If you would like to apply for this position, please send your application in English by 15.05.2014.
